

STANLEY INDUSTRIES INC OUR COMMITMENT TO QUALITY ISO 9001:2015

With over 50+ years in the fastener industry, Stanley Industries Inc. has the quality products and services you need. We continually strive to maintain quality excellence, and since 1997 we are proud to be one of the first distributors in Michigan to be ISO 9001 certified. Throughout the annual audit processes we have achieved zero non-conformances for over 10 years running! Our certified ISO 9001:2015 quality system:

- Conducts Annual Internal Audits
- Annual Surveillance Audits
- Gages Verified and Calibrated on Regular Basis
- Supplied and Serviced by A2LA Accredited Calibration Laboratory

Quality Control

Stanley Industries Inc. conducts In-House Lab inspection and testing to monitor quality and production reliability. We maintain and implement procedures to control our inspection, measuring, SPC data collection and test equipment, and to ensure that all requirements of the applicable ISO 9001:2015 clauses are met. Our testing equipment consists of:

- Threaded Ring and Plug Gages
- Statistical Process Control
- Micrometers
- Calipers, up to 48"
- Rockwell Hardness Testing
- Optical Comparator
- Torque Tester
- Recess Checker

In addition, our world-class manufacturers adhere to the same rigid Quality System with A2LA certified testing laboratories as well as additional Automotive Industry Quality standards: ISO 9001:2015, ISO/TS16949, and IMDS Compliant. For those quality critical fasteners we can also provide mill and material certification, plating certification, ISIR and PPAP documentation plus 100% visual and machine sort.
